

KAUSTAV DAS

Lead Software Engineer COO-Tech

Bangalore, India | Kaustav.das@wellsfargo.com | +91 7829673917

PROFESSIONAL SUMMARY

Seasoned Lead Software Engineer with 18+ years of experience driving large-scale modernization programs in Regulatory and Compliance domains. Proven track record of leading cross-functional engineering teams to deliver business-driven transformation, including regulatory remediation, audit finding closure, and modernization of legacy platforms. Skilled at balancing business priorities with regulatory obligations, partnering with compliance/audit teams, and aligning technology roadmaps with enterprise risk standards.

Hands-on leader with expertise in Java, Spring Boot, Kubernetes, and cloud-native engineering, delivering resilient, scalable, and compliant platforms. Extending expertise into AI/GenAI technologies with practical experience in intelligent automation, LLM-powered email triage, and exploration of agentic AI frameworks such as LangGraph for enterprise workflow automation. Now seeking to apply compliance modernization expertise into broader financial crimes and regulatory technology domains.

CORE COMPETENCIES

Regulatory Compliance (SCRA) • Audit Remediation • Incident Response • Application Modernization • Cloud Migration (PCF → OCP) • Microservices & APIs • DevSecOps / Secure SDLC • NFR Governance (Scalability, Performance, HA, DR) • Vendor Engagement (Oracle) • Budget Planning & Allocation • Executive Stakeholder Engagement • Agile Delivery & Roadmapping • Architecture Review & Standards • Manager + Engineer Leadership

TECHNICAL EXPERTISE

- **Programming Languages:** Java, Python
- **Frameworks:** Spring Boot, Hibernate, Apache Kafka
- **Cloud Platform:** Tanzu, OpenShift, AWS, Azure, Google Cloud
- **DevOps Tools:** Jenkin, IBM Urban Deploy, Harness, Docker, Kubernetes
- **Databases:** Oracle, MySQL, MongoDB

WORK EXPERIENCE

WELLS FARGO | BANGALORE, IN

LEAD SOFTWARE ENGINEER, SMIS 2.0 (2020-PRESENT)

- **Directed** regulatory-driven modernization of SCRA/SMIS, delivering **audit finding remediation** and application changes within **tight deadlines**, preventing repeat compliance gaps.
- **Led** a cross-functional team **peaking at 22 engineers** (currently 7) across locations; blended **architecture review, secure SDLC governance, and hands-on coding** to accelerate compliant delivery.
- **Partnered** with compliance/audit to remediate production incidents with potential compliance/SLA impact, avoiding escalation and stabilizing KPIs.
- Worked with the SCRA leadership team **to plan and create the SMIS modernization roadmap for a \$250K budget**, aligning spend with compliance mandates, technical debt reduction, and business priorities.
- **Presented** modernization updates and compliance closure status to **SCRA CoE Leadership**, influencing prioritization and release plans.

- **Drove** platform migration **PCF → OCP**, leading **NFR initiatives** (scalability, performance, HA, DR); instituted reliability patterns and capacity planning for regulatory workloads.
- **Standardized** design/coding practices and architecture reviews to enforce secure SDLC, data protection, and operational readiness by adapting the enterprise Orchestra platform; improved deployment lead time and enforced strong hard gates for production releases.
- **AI/GenAI Hackathon 2025**: Developed **Email Triage System** using LLMs and Python — automatically classifying mailbox requests and routing to correct serving groups. Created prompts and core logic, demonstrating potential for **intelligent compliance operations automation**.

WELLS FARGO | BANGALORE, IN

APPLICATION ARCHITECT / SDE4, SMIS 1.0 (2015-2020)

- **Championed** an **API-first strategy** by developing **headless BPM workflows**, accelerating integrations, and **reducing time-to-market** for SMIS compliance processes by 30%.
- **Partnered** with SMIS Product teams to design **BPM workflows**, achieving **zero** compliance breaches across critical processes.
- **Led** workflow automation and process re-engineering that reduced manual touchpoints and improved operational efficiency by **30%**.
- **Engaged** with **Oracle vendor** teams to implement platform features and resolve **DB compliance vulnerabilities**, aligning fixes with Wells Fargo security baselines.
- Established robust **QA and automated testing frameworks**, ensuring zero defect release.

ORACLE | BANGALORE, IN

SR. PRE-SALES CONSULTANT (2012-2015)

- **Advised** enterprise clients on **cloud-native and Java-based architectures**, shaping modernization roadmaps and migration strategies.
- **Conducted** technical deep dives and enablement sessions to accelerate adoption of **modern frameworks and integration patterns**.
- **Influenced** C-suite stakeholders by translating business needs into scalable, secure reference architectures; supported deals totaling **2.5M multiple accounts**.

ACCENTURE | PLEASANTON CA, DETROIT, MI

TEAM LEAD (2006-2012)

- **Established** an **Oracle Center of Excellence (CoE)**, standardizing Fusion development practices across global delivery teams.
- **Led** design and development of the **Accenture Foundation Platform for Oracle (AFPO)** to accelerate ERP/SOA/BPM implementations; reduced implementation timelines by **25%**.
- **Spearheaded** SOA/BPM integration solutions to improve **scalability and interoperability** across platforms; created **security and performance** reference architectures.
- **Drove** reusable frameworks and documentation that reduced risk and improved onboarding for multi-project portfolios.

CERTIFICATIONS & LEARNING

- Certified Kubernetes Application Developer (in progress) – Cloud-native deployment expertise
- Advanced Java & Spring Boot (Security, Multi-threading, Distributed Systems) – Ongoing deep dive
- AI/GenAI: Exploring **LangGraph**, **Agentic AI**, and **Prompt Engineering** for enterprise workflow automation.

EDUCATION

NAGPUR UNIVERSITY | NAGPUR, IN
BE Electronic (2000-2004)

SELECTED PROJECTS (WELLS FARGO & PRIOR)

SCRA Domain Modernization (Wells Fargo) — *Engineering Lead / Application Modernization*

- **Architected** Java/Spring Boot microservices and cloud-native components to replace legacy BPM, improving extensibility and reliability.
- **Led** a high-performing team of up to 22 engineers to streamline SCRA processes and deliver net-new features absent in the legacy platform; incorporated lessons learned to reduce time-to-market for new features, enforced strong hard-gates and compliance checks, and improved overall application stability.
- **Established** backend development and review standards to drive on-time, low-defect releases.

Global Pre-Clearance System (Wells Fargo) — *Workflow/Integration Lead*

- **Designed** RESTful APIs and integrations (Spring Boot, Hibernate); automated key workflows via Oracle BPM and integration platforms.
- **Reduced** dev cycle time by 40% through platform reuse and integration best practices; improved audit readiness via structured change management.

AFPO (Accenture Foundation Platform for Oracle) — *Technical Leadership*

- **Developed** an enterprise integration platform leveraging Oracle Fusion Middleware to accelerate SOA/BPM deployments.
- **Created** reference architectures and performance optimization guides; **reduced project risk by 25%** across multiple programs.

PRISM (Platform for Reusable Integrated Service Management) — *SOA Integration Specialist*

- **Migrated** 500+ Java interfaces to a modern SOA platform; delivered **security and performance prototypes** and benchmarks.
- Produced reusable integration assets that **standardized connectivity** patterns and reduced delivery variance across teams.
